EDUCATION

The College of New Jersey

Bachelor of Science: B.S. in Computer Science, Minor in Multimedia

Ewing, NJ

Spring 2026

Technical Skills

- **Languages:** Python, Java, C++, JavaScript, SQL (PostgreSQL), Swift
- **Frameworks & Tools:** React, Node.js, Flask, Ruby on Rails
- **Developer Tools:** Git, VS Code, Xcode, Expo, Power BI
- **Design & Data:** Figma, Adobe Creative Cloud (PS, XD), PowerBI, JSON, SharePoint
- **Concepts:** REST APIs, RBAC, Agile/Scrum, SDLC

PROFESSIONAL EXPERIENCE & PRACTICUMS

Evtnti | Founding Software Engineer(Contributor)

Fall 2025 - Present

- Architected a mobile-first platform using React Native and Supabase, leveraging AI-assisted development to reduce initial feature turnaround time by 50%.
- Optimized event creation workflows through iterative user testing, implementing a real-time preview UI that reduced publishing time by 30% for beta hosts.
- Implemented secure API management by leveraging cloud database security protocols and environment variables to protect sensitive credentials and user data.
- Streamlined deployment pipelines via Expo EAS, cutting build-to-test cycle times by 40% and ensuring consistent distribution to TestFlight and the App Store.

WorkWell Pre-Screening & Registration System | *Client-Based Nonprofit Project*

Spring 2025

- Led development of a secure web platform designed to support 100+ users
- Reduced manual data entry time by ~40% through dynamic form automation
- Delivered features in 2-week Agile sprints, incorporating stakeholder feedback and compliance requirements
- Increased operational efficiency by centralizing intake and registration workflows into a single platform

Projects

BLE Wayfinding Capstone (In Progress) | *Swift, iOS, BLE, Accessibility*

Fall 2025 – Spring 2026

- Built a high-precision indoor navigation system using BLE beacons, addressing lack of reliable indoor GPS and enabling turn-by-turn routing across 10+ campus zones
- Developed a real-time safety rerouting engine (Dijkstra-based) that dynamically redirects users around blocked or hazardous areas, reducing reroute time to <1 second
- Designed an admin control system to flag danger zones and disabled POIs, enabling instant system-wide updates and improving emergency response coordination
- Integrated RSSI-based positioning with SwiftUI floor maps, achieving accurate indoor localization (<2s updates) and ensuring reliable “safe exit” routing in critical scenarios

Wild Sky Program Application | *HackTCNJ Social Impact Innovation Award Winner* | Trenton, NJ

Spring 2025

- Delivered award-winning solution (HackTCNJ Social Impact Innovation Award) in a team of 4
- Built a full-stack web application to estimate wildlife conservation incentives using multi-region environmental datasets
- Designed and implemented 5+ REST API endpoints for data processing and predictions

LEADERSHIP & PROFESSIONAL DEVELOPMENT

- National Society of Black Engineers (NSBE), The Haitian Student Association, Brother to Brother
